Flyer edition

“When you know better you do better.” — Maya Angelou

Whether you are looking for an introduction to metering technology or you need to get up to speed on a specific product, we have the comprehensive curriculum to help you reach your goals.

Master metering technology skills with our hand-on training that will help you understand, deploy, maintain, and secure metering infrastructures of all kinds. Once you've gotten the basics down, you can focus on specialized training on our products and solutions.

General Information

Standard Training Modules

Landis+Gyr provides training modules for all levels of knowledge and experience. Whether a new employee needs to learn the basics of meter technology, an experienced support technician has to get acquainted with one of our new products or an expert project leader wants to acquire in-depth knowledge of a full end-to-end solution, Landis+Gyr does assist customers to achieve what they require.

Standard training modules are offered in three levels: Basic, Advanced, and Expert.

- The **Basic Modules** provide a general overview of Landis+Gyr products and solutions.
- The **Advanced Modules** dig deeper into specific topics. Employees learn to work with and support products and solutions in their standard environment.
- The **Expert Modules** are workshops focusing on specific topics in (almost) real situations. Advanced level is required to attend Expert modules.

See our Training Schedule to register for training courses on www.landisgyr.eu/training/training-schedule.

Customized Training Sessions

Customized training sessions can be set up to address specific training needs of our customers effectively. The training program is created based on specific needs and dedicated to individual customers.

See our Customized Training Session page for details on www.landisgyr.eu/training/customized-training-session.

For more detailed information, please contact your local sales representative or our Training Services Center at headquarter's in Switzerland.
